

Job Title: Surveyor

General Description:

Reports to the Hydrographic Surveyor while providing leadership to the Maritime Administration Department (MARAD) in all aspects of hydrography, tidal and dredging matters, including maritime safety information and approvals for permission to operate within the exclusive economic zone.

Primary Duties and Responsibilities:

The Surveyor will deliver the following duties and responsibilities in a manner that is consistent and cognizant of the MARAD vision and mission:

Hydrography and Navigation

1. Assist in planning and supervising all hydrographic surveys within the navigable waters for the Government of Guyana
2. Assist in the compilation and printing of the Tide Tables and the List of Lights annually
3. Assist in drafting responses as it relates to the processing and granting of approvals for dredging projects along the navigable waterways in Guyana
4. Assist in drafting responses as it relates to the processing and granting of approvals for marine construction projects along the navigable waterways in Guyana
5. Assist in conducting hydrographic surveys within all navigable waterways for MARAD
6. Assist in the establishment of a Tidal Network along the coast and internal waterways of Guyana (installation of Tide Station/Gauges).
7. Assist in drafting notice to Mariners.
8. Assist in the compilation of navigational charts of all navigable waterways in Guyana.
9. Assist in the preparation of Tidal Graphs and Mean Sea Level Computations
