Request for Tender: Development of Maritime Registry Web Portal

Objective:

- Develop a reliable Maritime Registry Web Portal to enhance accessibility of maritime data, and facilitate seamless interaction between stakeholders.

Features:

- User-friendly interface for viewing vessels and seafarers' details
- Advanced search functionality for vessel and seafarer information.
- Interactive dashboard for administrators and users.
- Document management system for uploading and accessing required documents.
- Notification system for updates and alerts.

Technical Requirements:

- Utilize modern web technologies ensuring scalability, security, and reliability.
- Provide post-launch support and maintenance services.

Proposal Guidelines:

- Provide a detailed proposal outlining your approach, methodology, and technologies to be utilized.
- Include a breakdown of costs, including development, testing, deployment, and ongoing support.
- Highlight relevant experience and past projects in web development, particularly in the maritime or government sector.
- Specify the team structure and expertise of key personnel involved in the project.

Submission Details:

Please submit your proposals electronically to procurement@marad.gov.gy with the subject line: "Proposal for Maritime Registry Web Portal", by March 22, 2024. Queries can also be forwarded to the same email, beforehand.
